BARGAINS

is a rather dangerous word to use. And I'm not particularly fond of danger. So I soft pedal on this easily used and more frequently abused word, in the description of the splendid offerings presented in this issue of my COIN CIRCULAR.

But where I do use the word "bargain" I don't hesitate to say here that it is used in the right place and at the right time.

The coins, etc. offered here are not the finest nor the rarest in the world. Your degree of comfort and happiness may and may not be enhanced by their purchase. But they ARE all mighty good values and there are some mighty rare and highly interesting specimens offered here at attractively purchasable prices. You are assured of one thing, however, that you will be pleased with whatever you may purchase or your money comes back to you pronto. I want your friendship and good will more than I do your cash.

The items offered here are all especially priced so that they would sell quickly, therefore, cash orders will be given preference.

Order promptly. I promise prompt service. And I have never missed a promise.

Very cordially yours,

A handwritten signature in cursive script, appearing to read "B. M. Mell". The signature is written in dark ink and is positioned to the right of the typed name.

FINE COMPLETE COLLECTION OF LARGE U. S. CENTS

Offered Here Real Cheap!

Have just purchased this collection, and offer it complete at just about half the price it would cost you if purchased piece by piece.

This is not an ordinary "set of cents." There are over 130 DIFFERENT dates and varieties including the rare 1793 chain, 1799, 1803 large 3, 1804, 1809, 1839 over 36, etc. It includes ALL the principal types and varieties as follows:

1793 Chain and wreath types; 1795, plain and lettered edge; 1796, Liberty cap and bust types; 1799, a coin that would cost \$10 to \$15; 1803, includes the large 3 variety; the 1804 cost former owner \$17.50; both varieties of 1805; three varieties of 1807; two of 1808; two of 1810; two of 1811, '12; two of 1814. From 1816 to 1857 there are all of the principal varieties and practically all are attributed according to Andrews. There are forty-three different varieties from 1793 to 1814 alone, and a total of 133 all different varieties. The cents from 1793 to 1814 alone are worth more than my price for the entire collection and the collection if purchased separately could not be duplicated for double its price. The condition will average fine. The early dates, of course, are good to very good and fine; the others up to uncirculated.

As the large cents are in great demand, and values steadily advancing, I consider this a most advantageous purchase.

The first cash order gets this fine collection for only \$165.

(The cents from 1793 to 1814 in this collection could hardly be purchased piece by piece for the price of the entire collection.)

DOES IT PAY TO ADVERTISE?

In the last issue of my COIN CIRCULAR under the head of "R. R. Announcement," I told of some of my virtues and of a few of my vices and suggested that an invitation for a visit would be gratefully considered by me.

Among the rather flatteringly numerous invitations I received, was one from Mr. D. Thos. Rees of New Orleans. Having had the pleasure of a previous visit with Mr. Rees and being flattered in having a repeat invitation extended me, and New Orleans not being too distant from the center of numismatics (Fort Worth, of course) I made the journey to my great pleasure and satisfaction. And what is more important, this visit will also prove of much interest and importance to ALL collectors.

The little visit resulted in Mr. Rees placing with me for sale at auction his extensive and valuable collection of rare coins. The collection is remarkable in its completeness of the gold, silver and copper coins of England, Scotland, Ireland and British Colonies, together with a fine representation of the coinage of the United States, including a few mighty rare Colonials, Pioneer gold, etc. The collection also contains a remarkable series of the counter-stamped and cut coins. The British section is by far the most complete ever before offered in this country.

The ancient section is also one of the finest that has ever appeared at auction in America. There are hundreds of gold, silver and bronze specimens in the finest state of preservation and practically complete representations of the various Emperors, etc. As a general collection of the highest quality and interest, I think none has been offered to equal it in several years. It is the kind of a collection where I don't give a hang whether I make a dime or not on the sale of it. But I just jump in and get out a catalog as fine as money and good printing can

possibly produce; a catalog which is waste-basket proof; a numismatic reference work and a pride to the owner of the collection and to the humble cataloger.

Am not making any definite promises as to just when the sale will be held. Mr. Rees is sensible. He knows it takes time besides money to get out the kind of a catalog his collection deserves. But the sale will be held in the near future.

However, it is important for you to see now that you are on my "Mehling List." If you have bought say \$5 or more of me in the recent past you'll get a catalog without writing for it, otherwise it may be necessary for you to purchase a Price List of the sale. But the catalog will be worth a great deal more than any price I may place on it.

A "FATAL" COMMEMORATIVE COIN

The Silver Ruble or Dollar of Russia. Issued in 1913—(just one year before the war)—commemorating the 300th anniversary of the founding of the Romanoff Dynasty.

On the obverse, the coin has the portraits of the first and last Czars. Reverse, the Russian double-headed eagle—with dates 1613-1913. The edge is lettered.

An interesting historical coin—and the price, due to a small lot I ran across in Europe—is only, now \$1.50.

SPEAKING OF RUSSIA

Here is a country that was part of Russia. It is now Lithuania. Have not seen its silver coins until I went there. Brought a few of their larger coins with me. It's a 5 LIT piece. Slightly larger than our half dollar. It's their largest silver coin. Knight in Armor charging. Rev., value within wreath of poppies. Price, \$1.75 each.

AN 1804 CENT

It's the perfect die variety. The coin was originally classed and purchased as "very fine for coin." It is well struck, free from any serious dents or nicks; its surface is dark and not very smooth. Have known no better specimens of this rare cent to sell from \$50 to \$75. I don't claim my price for it is a bargain but I do insist that it's mighty good value. Price, \$37.

If you have been looking for a desirable 1804 Cent, this is one for you.

AND A 1799 CENT

Perfect date variety. Not an uncirculated specimen (which, by the way, does exist and which changed hands at \$2,500) but a better-than-average coin with unusually good date with all of the last 9 showing plainly and everything plain on reverse. Strictly good. And I don't mean "good for coin." In fact it would really muster as very good. Price \$25. It's a better 1799 cent than the price would signify it to be.

A Genuine Two Thousand Year Old Silver Coin FOR A SONG

Interesting little silver coin of Crete, Cydonia, B. C. 200-67. Hemidrachm. Head of Goddess. Reverse, a square. Also a variety with wolf or dog on reverse.

These usually retailed at 75c to \$2.50 each. I ran across a small "nest" of them—and offer them while they last at only 45c each or the two varieties for only 75c.

Better buy a few sets.

Encased Postage Stamps of the World War

These are similar to but larger than our own encased postage stamps issued and passed current during our war between the States. These encased stamps are of various denominations of stamps framed under mica and passed current at their face value. Issued in France, Germany, Italy, etc. The stamps, of course, are all unused. Interesting and colorful designs. All are perfect. These are and will always be of historic and numismatic interest.

This collection contains 111 pieces, all perfect. They retail at about 25c to 50c each. I'll sell the entire collection for only \$15.

First cash order gets it.

THREE GREAT CANADIAN RARITIES FOR SALE—but not cheap!

The first two—a set of the great rarities of the 1823 British Colonial 1/50 and 1/100 Dollar, Breton Nos. 861 and 862 in perfect proof condition.

The third rarity is a heretofore almost unknown coin or token. It is the ANSE CANOT as Breton No. 924 but with 40 instead of 10. This specimen is also in uncirculated condition with a light brown surface with traces of original red.

I secured these rarities in an old collection in Europe.
Price—?—

If really interested write and ask me and I'll tell you all about it.

I think a whole lot of these pieces but will listen to reason.
